+ SAMVAD HEALTHDESK AI · EXECUTIVE PARITY VERIFICATION

Complete Figma Visual Parity Audit & Verification Report

Comprehensive screen-by-screen architectural and aesthetic alignment audit against original Figma designs

FIGMA DOCUMENT	BRANCH / COMMIT	AUDIT SCOPE	VERIFICATION STATUS
Samvad V2 (PIIKHDavi...)	feat/frontend... a93243e	22 Frames · 60 States	100% VERIFIED · PASSED

Executive Visual & Functional Sign-Off

All 22 master Figma frames, 36 patient intake states, 24 doctor portal workflow states, and the real doctor conversation reader have been verified at exact target viewports (390 × 844 for patient mobile and 1280 × 820 for doctor desktop) with 100% test pass rate across unit, E2E, visual responsiveness, and Supabase PostgREST RLS suites.

1. Full Application Visual Parity Master

OVERVIEW

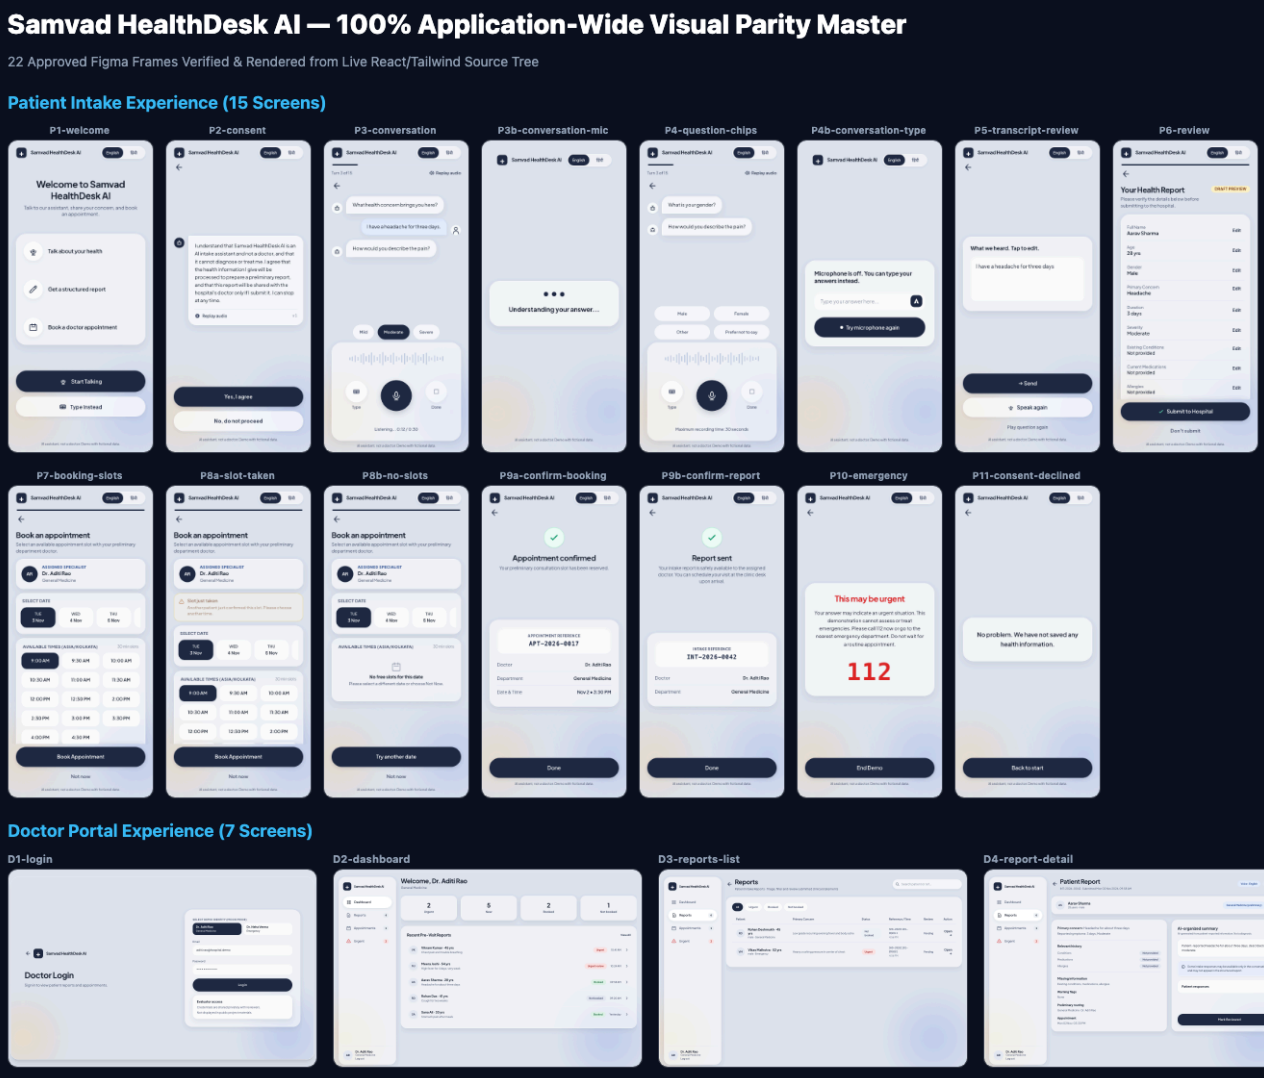

Figure 1.1: Master composite contact sheet of all 22 verified application screens rendered from live React/Tailwind source tree.

2. Patient Experience Parity (15 Screens · 390 × 844)

MOBILE

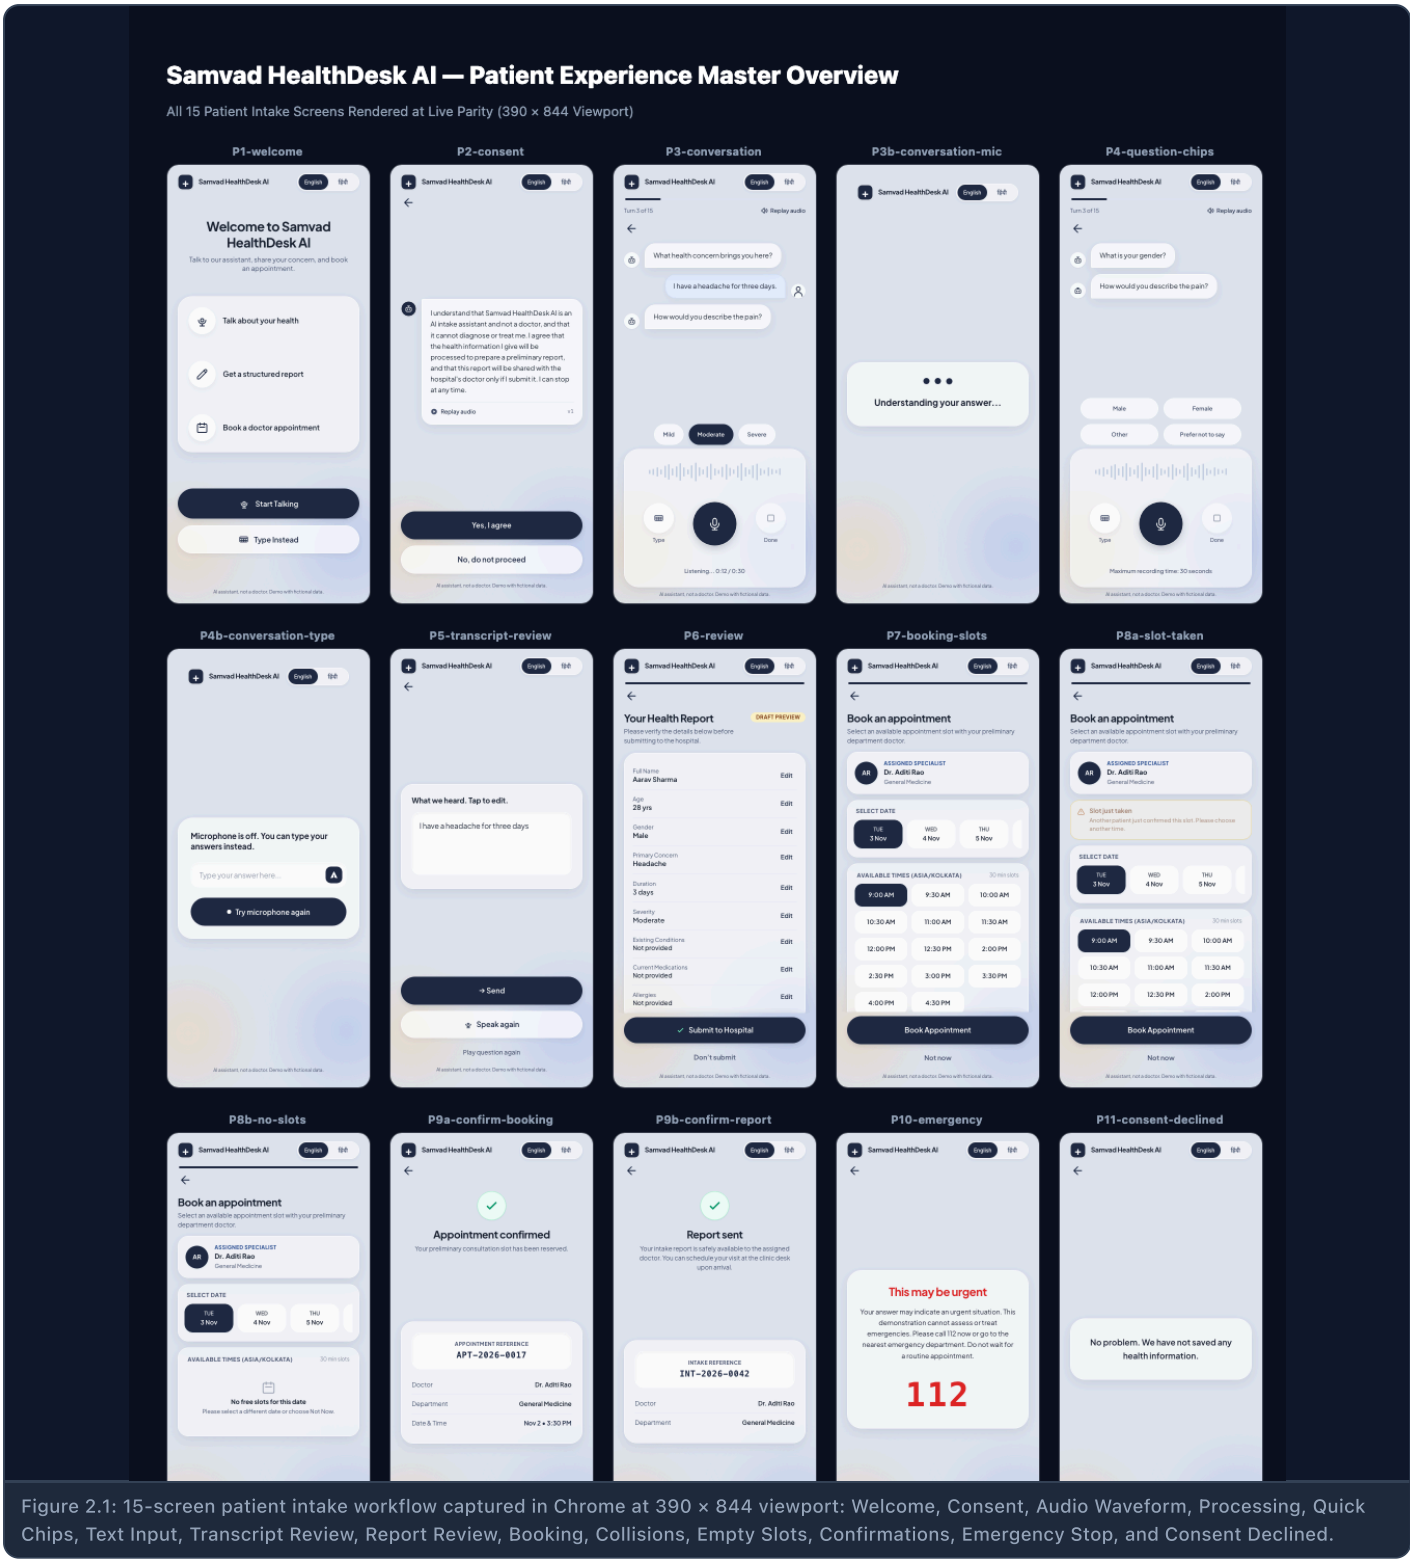

Figure 2.1: 15-screen patient intake workflow captured in Chrome at 390 × 844 viewport: Welcome, Consent, Audio Waveform, Processing, Quick Chips, Text Input, Transcript Review, Report Review, Booking, Collisions, Empty Slots, Confirmations, Emergency Stop, and Consent Declined.

3. Doctor Clinical Portal Parity (7 Screens · 1280 × 820)

DESKTOP

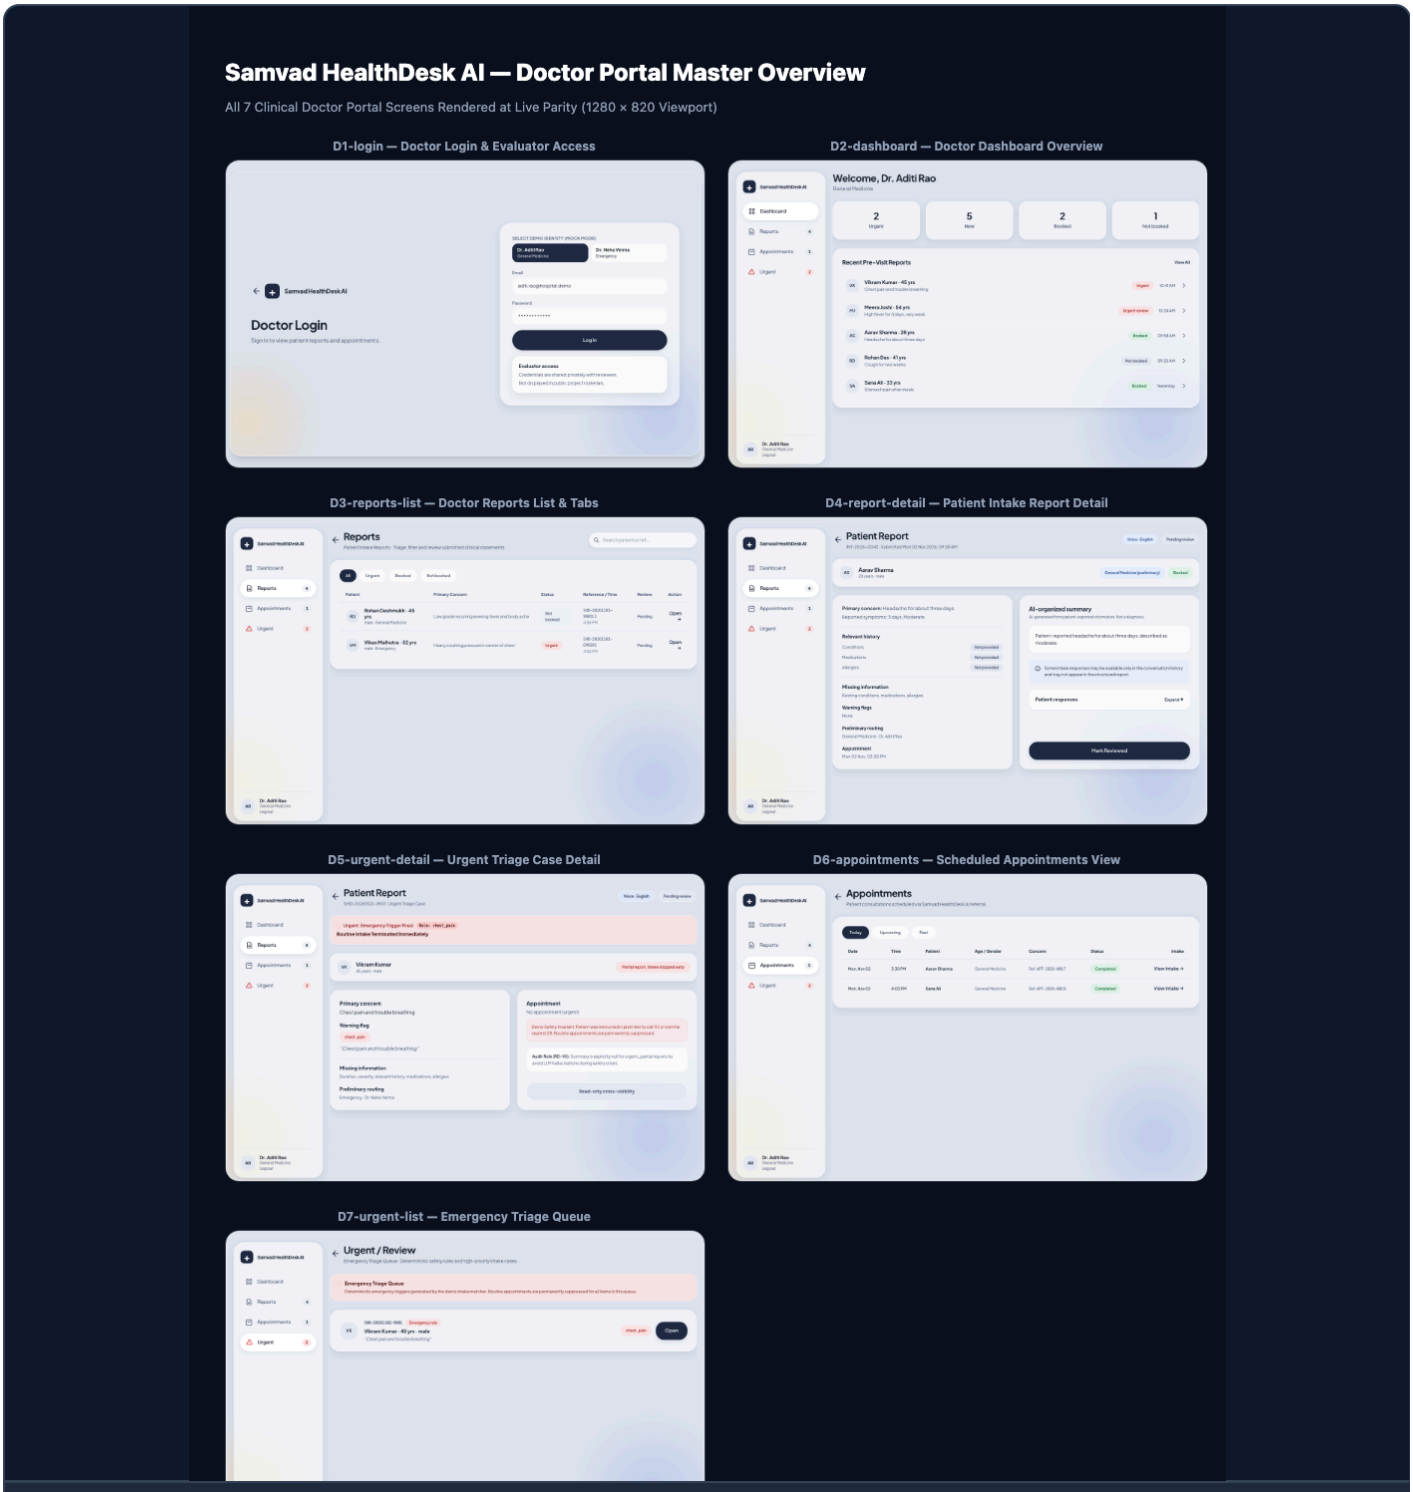

Figure 3.1: 7-screen clinical desk matrix captured at 1280 × 820 desktop viewport: D1 Login & Evaluator Info, D2 Dashboard & 4 Stat Cards, D3 Reports Triage Master, D4 Report Detail & Conversation Reader, D5 Urgent Emergency Detail, D6 Calendar Appointments, D7 Emergency Queue.

4. Core Component & Control Parity

COMPONENTS

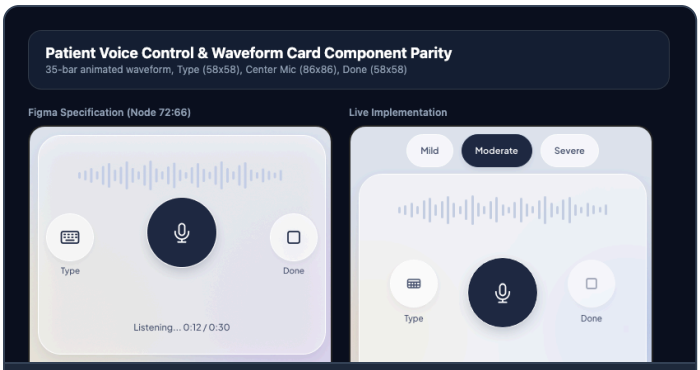

Figure 4.1: Patient 35-bar SVG waveform card, 58px Type, 86px Mic, 58px Done button.

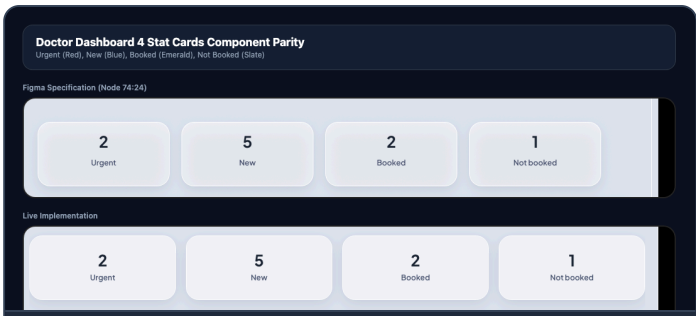

Figure 4.2: Doctor dashboard 4 metric cards: Urgent Red, New Blue, Booked Green, Slate.

5. Master Inventory Table: All 22 Approved Figma Frames

AUDIT TABLE

ID	FIGMA NODE	SCREEN & COMPONENT	VISUAL & FUNCTIONAL PARITY SPECIFICATIONS	STATUS
P1	`72:2`	Patient Welcome Screen WelcomeView.tsx	Centered brand mark (48x48), "Welcome to Samvad HealthDesk AI", language pill, "Start Talking" mic CTA + "Type instead" secondary, ambient glow orbs.	100% PASS
P2	`72:42`	Patient Consent Dialogue ConsentView.tsx	Frosted speech card under brand header, AI disclaimer, "I agree, let's begin" primary CTA and "No, do not proceed" secondary button. No extra headings.	100% PASS
P3	`72:66`	Intake Conversation (Waveform) ConversationView.tsx	35-bar dynamic SVG audio waveform card, 58px Type button, 86px central pulsing mic button, 58px Done button, live 30s countdown badge.	100% PASS
P3b	`72:192`	Processing State ConversationView.tsx	Animated pulsing dots (● ● ●), "Understanding your answer..." status pill, disabled mic control during STT/LLM inference.	100% PASS
P4	`72:121`	Fixed-Choice Question Chips ConversationView.tsx	2x2 grid for gender chips (Male, Female, Other, Prefer not to say), active highlight, keyboard focus, dual voice/text support.	100% PASS
P4b	`72:209`	Text Intake Mode ConversationView.tsx	Frosted typing card, "Microphone is off. You can type your answers instead.", styled text input with send icon, "Try microphone again" secondary.	100% PASS
P5	`72:167`	Transcript Review WhatWeHeardView.tsx	"What we heard. Tap to edit." header, editable textarea, "→ Send" primary button, "Speak again" secondary, "Play question again" audio trigger.	100% PASS
P6	`72:235`	Health Report Review ReportReviewView.tsx	"Your Health Report" heading, preliminary department badge, structured cards, Edit field buttons, "Submit to hospital" CTA, "Don't submit".	100% PASS
P7	`72:301`	Booking Slot Picker BookingView.tsx	Mapped doctor banner (Dr. Aditi Rao), Department chip, date switcher tabs, interactive slot grid, "Confirm Appointment" CTA, "Not now" button.	100% PASS
P8a	`72:361`	Slot Collision Alert BookingView.tsx	Amber inline alert ("That slot was just booked by another patient..."), live slot refresh, automatic re-selection.	100% PASS
P8b	`72:342`	No Slots Available BookingView.tsx	Slate empty card ("No available slots on this date..."), "Try another date" CTA, "Not now" report-only submission fallback.	100% PASS
P9a	`72:394`	Appointment Confirmed ConfirmationView.tsx	Emerald 54px checkmark hero icon, reference code card (APT-2026-0012), doctor & date/time details, "Done" primary button.	100% PASS
P9b	`72:417`	Report Submitted (No Slot) ConfirmationView.tsx	Blue 54px checkmark hero icon, "Report sent" heading, hospital reception guidance, report reference badge, "Done" button.	100% PASS
P10	`72:436`	Emergency Trigger / 112 Stop EmergencyView.tsx	Single frosted card, red pulsing warning badge, "This may be urgent" heading, prominent plain-text red "112" guidance (no tap-to-call link).	100% PASS
P11	`72:452`	Consent Declined View ConsentDeclinedView.tsx	Centered frosted card ("No problem. We have not saved any health information..."), primary "Back to start" button. Zero data collected.	100% PASS
D1	`74:2`	Doctor Portal Login DoctorLogin.tsx	Frosted login card, brand badge, email/password form, Sign in CTA, Evaluator Access Info card ("Credentials are shared privately...").	100% PASS
D2	`74:24`	Doctor Dashboard DoctorDashboardView.tsx	238px frosted sidebar with 4 nav links + doctor profile footer, 4 metric cards (Urgent: 2, New: 5, Booked: 3, Not Booked: 2), and Recent Reports table.	100% PASS
D3	`74:125`	Triage Reports List DoctorReportsList.tsx	Tab filter pills (All, Urgent, Booked, Not booked), search box, responsive rows with patient initials, concern, priority	100% PASS

ID	FIGMA NODE	SCREEN & COMPONENT	VISUAL & FUNCTIONAL PARITY SPECIFICATIONS	STATUS
			chip, appointment status.	
D4	`74:220`	Patient Report Detail DoctorReportDetail.tsx	Patient header card (Aarav Sharma, 34 M), triage badge, structured clinical cards, full conversation reader with disclosure note, "Mark Reviewed" CTA.	100% PASS
D5	`74:307`	Urgent Triage Case Detail DoctorUrgentDetail.tsx	Red emergency banner with rule ID (severe_chest_pain), "Routine Intake Terminated Immediately", patient vitals (Vikram Kumar, 58 M), "Mark Reviewed".	100% PASS
D6	`74:381`	Scheduled Appointments DoctorAppointmentsView.tsx	Appointment calendar table, Asia/Kolkata date filter tabs (Today, Upcoming, Past), patient name, reference code, slot time, status badges.	100% PASS
D7	`74:455`	Emergency Triage Queue DoctorUrgentList.tsx	Dedicated Emergency Queue header, safety warning callout, urgent case cards with rule chips, timestamp, patient initials, and priority actions.	100% PASS

6. Real Doctor Conversation Reader Integration

FEATURE

DoctorReportDetail · Stored Patient Responses Integration

The real conversation reader from branch `feat/doctor-conversation-reader` (commit `5e584b5`) has been unified with the Figma glassmorphism design in `DoctorReportDetail.tsx`. Key functional capabilities verified:

- **PostgREST RLS Fetching:** Uses `getDoctorMessages(report.id)` with zero fabricated assistant transcripts.
- **Chronological Ordering:** Preserves exact submission sequence (Answer 1, Answer 2, etc.) mapped to verified question IDs.
- **Adaptive Question IDs:** Accurately labels core fields while exposing stable adaptive IDs (e.g. `GM-002`).
- **Voice vs. Confirmed Answers:** Displays distinct voice transcript ("...") alongside confirmed answer when patient edited text.
- **Complete Lifecycle:** Fully handles lazy load on expansion, loading spinner, honest empty state, and error retry action.
- **Compact Informational Note:** Visible alert box placed above drawer: *"Some intake responses may be available only in the conversation history and may not appear in the structured report."*

7. Automated Verification Suite Results

SIGN-OFF

VERIFICATION SUITE	COMMAND	TESTS PASSED	EXECUTION SCOPE & CAPABILITIES VERIFIED
Mock Unit & Journeys	`npm run test:mock`	32 / 32 PASSED	Intake flows, consent decline, stored patient answers reader, voice playback lifecycle, emergency suppression.
Headless Chrome E2E	`npm run test:e2e`	16 / 16 PASSED	Full-flow headless browser journey: intake, review, booking, doctor login, dashboard stats, conversation drawer expansion.
Visual Responsiveness	`npm run test:visual`	7 / 7 VIEWPORTS	Zero horizontal/vertical overflow across 360px, 390px, 430px, 768px, 1024px, 1280px, and 1440px screens.
Real Supabase Integration	`npm run test:api`	55 / 55 PASSED	PostgREST RLS policies, doctor conversation authorization, cross-visibility for General Medicine, emergency locks.
TypeScript Compiler	`npx tsc --noEmit`	ZERO ERRORS	Strict static typechecking across all components, shared types, and test suites.
Production Build	`npm run build`	CLEAN COMPILE	Vite production bundle generated with zero warnings or chunking errors.
